Prototype rules, not an official COIN-series publication

1.0 Introduction

A Handful of Bandits is a two-player research prototype about the conflict in southeastern Turkey. One player directs the **State** and the other the **PKK**. The State seeks Support and Legitimacy. The PKK seeks Opposition and domestic Bases. Military Control, political attitudes and national Legitimacy are separate measures.

This edition covers **Scenario A, 1984–1989**, the current playable prototype. It uses Campaigns C1 and C2 and ends no later than the second Propaganda round. It includes the designer decisions implemented in ruleset R3. It is not a balanced or final published game.

Reading the rules. Numbered rules give the procedures. Italic examples explain them. Card text can modify a procedure (5.1). Section 10 gives the complete setup. Appendix A reproduces the current C1/C2 Event text. Appendix B identifies implementation differences and systems outside this edition.

DESIGN NOTE: *Pieces, Population (Pop), Resources and scores are design weights. They are not counts of people, measures of ethnic preference or historical estimates of force size. No rule awards points for casualties or displacement.*

1.1 General Course of Play

Reveal one card at a time. On an Event card, First Eligible chooses an action. Second Eligible then responds within the options that the first choice permits. Adjust initiative and reveal the next card. A Propaganda card interrupts card play for income, upkeep, political spending and other adjustments (6.0).

There is **no next-card preview**. A faction may remain First Eligible for several cards. Passing does not automatically give priority to the passer (2.4).

1.2 Components

Use a board with 13 domestic spaces and five external boxes, the C1/C2 cards, one six-sided die, two initiative cylinders, track markers and these pieces:

State pieces	Supply
Troops	30
Police	24
Village Guards	16
State Bases	8

PKK pieces	Supply
Guerrillas	30
PKK Bases	12
Leadership marker	1

Guerrillas have **Underground** and **Active** states. The Leadership marker has **Present** and **Abroad** sides. Keep Available pieces separate from Guards that are Out of Play. The prototype also uses Support/Opposition, Harm, Coercion, Reception, Capability and Momentum markers. Other markers may appear through Events (8.0).

1.3 The Map

1.3.1 Domestic spaces. Each domestic space has a terrain type and Pop. Only domestic spaces contribute Support, Opposition and Bases to victory scores. Pop remains unchanged by displacement.

Space	Terrain	Pop [design]
Hakkari	Mountain	1
Botan	Mountain	2
Mardin-Batman	Plain	4
Diyarbakır City (Amed)	City	2
Diyarbakır Rural	Plain	2
Şanlıurfa	Plain	4
Adıyaman	Plain	2
Elazığ	Plain	2
Dersim (Tunceli)	Mountain	1
Bingöl-Muş	Mountain	3
Van-Bitlis	Mountain	4
Ağrı	Mountain	2
Western Cities	City	3

1.3.2 Adjacency. A shared gameplay border or listed link determines adjacency. Decorative rivers and relief have no additional rule effect. Diyarbakır City touches only Diyarbakır Rural. Section 10.4 lists all movement links.

1.3.3 External boxes. Syria-Bekaa, KDP Zone, PUK Zone, Iran and Europe are external. They have no Support, Opposition or Control and do not contribute Bases to the PKK victory score. Syria-Bekaa, KDP and PUK hold camps subject to host posture (8.1). KDP and PUK are Mountain for combat. Iran is Event-only. Europe holds a track and **no pieces**.

1.3.4 Western Cities. This domestic City is an abstract political node with no land adjacency. No Garrison, Sweep or March enters or leaves it. State pieces can enter or leave by Air Mobility or Redeploy, or be placed by Train or Events. The PKK can Rally there; its Guerrillas cannot March out. No PKK Base or Village Guard may be placed there.

1.4 Pieces and Supply

1.4.1 Placement and removal. Place pieces from Available. Removed pieces return to Available unless the card says otherwise. Newly placed Guerrillas are Underground. Bases never move. Guards never move. There is no Casualties box.

1.4.2 Finite supply. An ordinary Operation must meet its placement and stacking requirements. An Event does as much as possible with the available supply (5.1). The simulator does not provide voluntary on-map piece withdrawal to replenish supply; see Appendix B for the difference from the wider research draft.

1.4.3 Stacking. Each domestic space may hold at most two Bases of each faction. Each external camp box may hold at most two PKK Bases. No PKK Base in Western Cities; no State Base in an external box. A Mountain or Plain may hold at most three Guards. Troops, Police and Guerrillas have no general stacking limit.

1.4.4 Foreign access. Only PKK pieces may occupy Syria-Bekaa or Iran. State Troops enter KDP or PUK only through Cross-Border. No Police, Guards or State Bases enter an external box. Markers do not count for stacking or Control.

1.5 Control

A faction Controls a domestic space when its pieces there outnumber the other faction's pieces. Count Troops, Police, Guards and State Bases for the State; count Guerrillas of both states and PKK Bases for the PKK. A tie gives neither faction Control. Markers do not count.

Recompute Control when pieces change, except during Redeploy, which uses the position before either faction moves (6.8). Control gives no victory points by itself and does not change Support or Opposition.

EXAMPLE: *Botan starts with two Troops and one Police against two Guerrillas and one PKK Base. The piece totals are 3–3, so neither side Controls it. Its Passive Opposition remains in place.*

1.6 Support and Opposition

Each domestic space is at one of five levels, in this order:

Active Opposition → Passive Opposition → Neutral → Passive Support → Active Support.

A shift moves one level. A shift toward Support from Passive Opposition first reaches Neutral. Neutral has no marker. Passive Support contributes Pop to Total Support; Active Support contributes twice Pop. Opposition scores the same way for Total Opposition.

Coercion blocks shifts in either direction. State Harm blocks shifts toward Support. PKK Harm blocks shifts toward Opposition. Reception also blocks Support shifts until relieved. Remove the relevant blocks before paying for a shift (3.6).

1.7 Resources, Legitimacy and Europe

Resources range from 0 to 50 for each faction. Pay the full required cost before taking a voluntary action. A forced loss stops at zero; unused excess is lost. Gains stop at 50.

Legitimacy ranges from 0 to 20 and represents acceptance of State conduct. It affects the State score, income and Propaganda Civic Action cap. If a Legitimacy loss would go below zero, lose two State Resources per unpaid Legitimacy point. Any remaining unpaid loss is ignored.

Europe ranges from 0 to 5. It represents diaspora resources and international pressure. At Propaganda it gives PKK income of 0 at Europe 0–1, 1 at Europe 2–3 and 2 at Europe 4–5. At 4–5 it also costs one Legitimacy in the political adjustment step.

1.8 Harm

State Harm count equals State Harm markers on the map. **PKK Harm count** equals PKK Harm markers plus Coercion markers on the map. Count qualifying markers in external boxes too. Disputed Harm belongs to neither faction. Harm affects victory eligibility and final margins (7.0).

Harm is not removed automatically. Civic Action can redress State Harm; Agitation can redress PKK Harm. Reset removes one Coercion per space. Events may remove or alter markers as printed.

2.0 Sequence of Play

2.1 Prepare the Game

Choose Scenario A and follow 10.0. Set PKK First Eligible and State Second Eligible. Build the C1 and C2 piles separately, then stack C1 above C2. Keep the PKK ARGK Formed Pivotal in hand; it is not shuffled into the deck.

2.2 Reveal a Card

Reveal the top card of the first pile with cards remaining. Apply any **Always** instruction immediately. If it is Propaganda, conduct 6.0. Otherwise offer the Pivotal window (5.3), then First Eligible acts.

Played cards and the count of cards left may be inspected. Unused pool cards and unrevealed cards remain unseen. Cards below a Propaganda card remain in the deck and are played after that round, in the new Campaign.

2.3 Choices on an Event Card

First Eligible selects one box and resolves its choice completely:

- **Event:** execute either side of the current card (5.0).
- **Limited Op:** one Operation in one location, without a Special Activity.
- **Op Only:** one Operation without a Special Activity. The simulator permits one or more locations; Appendix B records the research wording difference.
- **Op + SA:** one Operation with one permitted Special Activity.
- **Pass:** take no Operation or Event; gain Pass Resources (2.5).

Place that faction's cylinder in the selected box. Second Eligible then chooses from this matrix:

First chose	Second may choose
Event	Op + SA or Pass
Limited Op	Op Only, Op + SA or Pass
Op Only	Limited Op or Pass
Op + SA	Event, Limited Op or Pass
Pass	Any of the five boxes

After both factions finish, adjust eligibility (2.4), clear the boxes and reveal the next card. The responder cannot execute the same Event after First Eligible takes it. Pass is a distinct choice; taking the Event box and declining its text is not a substitute for Pass.

2.4 Next-Card Eligibility

Only the First Eligible faction's choice sets next-card order. Second Eligible's choice does not change that order.

First Eligible chose	Next card's First Eligible
Op Only or Op + SA	The other faction
Event, Limited Op or Pass	The same faction

If both Pass, keep the order. A Pivotal player becomes First Eligible (5.3). Reset separately restores PKK First Eligible (6.9).

EXAMPLE: *State is First Eligible, takes an Event and PKK Passes. State remains First Eligible next card. If State instead takes Op Only, PKK becomes First Eligible even if PKK Passes. Passing does not itself promote the passer.*

2.5 Passing

A passing State gains **2 Resources**; a passing PKK gains **1 Resource**, to the normal limit of 50. It takes no other action on that card. The other faction still receives its response. Pass does not defer a choice to a later point on the same card.

2.6 Limited Operations

A Limited Op selects one location, which may be a domestic space, a permitted external box or Europe for Rally. No Special Activity accompanies it. Garrison, Sweep and March may collect pieces from several origins into the one permitted destination. Train Civic Action and Rally Agitate remain permitted within that one location, at their normal extra cost.

2.7 Timing and Randomness

In this playable prototype, a Special Activity resolves **before or after** the Operation, not interleaved during it. Cross-Border and Ambush use before timing; Strike Collaborators uses before timing. Conditions and payment are checked on the board each part meets. An after-Operation SA that no longer meets its conditions is skipped.

Use a six-sided die for rolls. Apply printed modifiers without treating natural 1 or 6 as an automatic failure or success. Track changes stop at their endpoints, except Legitimacy overflow (1.7).

The simulator uses a stored random seed. The same scenario, options and seed reproduce the same deck and random sequence.

Home starts with seed 1. Select **Random** before Start for a new seed; a different seed can still give the same first card by chance.

3.0 Operations

3.1 General Procedure

Choose one Operation type and its locations. Pay its cost for each selected location unless it has a total cost. A piece cannot move more than once during the same movement Operation. Operations must satisfy their conditions and use only available pieces. A Special Activity has its own cost and limits (4.0).

Mountains: Sweep and Garrison activate one Underground Guerrilla per two eligible State pieces, rounded down. Assault removes one PKK piece per two Troops, rounded down. KDP and PUK count as Mountains. Guards assist detection, not Assault. In Cities, Police assist Assault.

3.2 State Operations

3.2.1 Train

Cost: 2 Resources per selected domestic space. Choose one option in each:

- **Recruit regular forces:** in a City or a space with a State Base, place one to three Troops and Police in any mix from Available.
- **Recruit Guards:** after Law 3175, in a State-Controlled Mountain or Plain with Police, place one or two Guards from Available, to the three-Guard limit. Tribal Allies removes only the Police requirement (5.2).
- **Build a Base:** in a State-Controlled Mountain or Plain with at least two Police and room for another State Base, replace two Police with one Available State Base.

After placement, the State may conduct Civic Action in **one selected space** (3.6). It needs State Control and Police there. No Troop is required for Train Civic Action. Pay Civic Action costs even if the Train is free.

3.2.2 Garrison

Cost: 2 Resources total.

Move up to six Police among domestic spaces, excluding movement into or out of Western Cities. Then select one space with Police and activate Underground Guerrillas there, up to the number of Police plus Guards. In a Mountain, halve that number and round down. Count pieces after movement. Troops do not contribute to Garrison activation.

For a Limited Op, all moved Police go to one destination and activation occurs there. Garrison does not move Guards or Troops.

3.2.3 Sweep

Cost: 2 Resources per selected space; 1 at OHAL Extended Powers.

Select domestic spaces other than Western Cities. Move any Troops from adjacent spaces into the selected spaces. Each Troop moves one step only. Police and Guards stay in place. Then activate Underground Guerrillas in each selected space up to the number of Troops, Police and Guards there, halved and rounded down in Mountains.

Use Cross-Border to Sweep a permitted Iraqi zone (4.2.2). For a Limited Op, select one destination; Troops may come from several adjacent spaces.

***EXAMPLE:** Botan has four Troops, one Police and two Guards. A Sweep can activate up to three Underground Guerrillas: floor((4 + 1 + 2) ÷ 2). It cannot then Assault as part of the same Operation.*

3.2.4 Assault

Cost: 2 Resources per selected space.

Use Troops to remove PKK pieces. Remove one per Troop, or one per two Troops in a Mountain, rounded down. In a City, Police count as Troops. Guards do not contribute. Use Cross-Border for Assault in KDP or PUK.

Remove **Active Guerrillas first**. A PKK Base may be removed only when no Guerrilla of either state remains in that space. Never remove an Underground Guerrilla by Assault. Unused removal capacity is lost. Removed pieces return to PKK Available. Removing a Base gives no State score or Legitimacy award.

3.3 PKK Operations

3.3.1 Rally

Cost: 1 Resource per selected location.

A domestic space must have no Displacement marker. A City must be Neutral or Opposition, except Western Cities may also be selected at Support. A host box must permit Rally (8.1). Iran cannot Rally. Europe is a separate Rally location.

Choose one option in each selected space or camp:

- Place one Available Guerrilla Underground.
- Replace two Guerrillas with one Available PKK Base, subject to stacking and host limits. No Base in Western Cities. The prototype removes Active Guerrillas first for this replacement.
- At a PKK Base, place up to **Pop + PKK Bases there** Guerrillas from Available. An external box counts as Pop 1. This is a placement allowance, not a ceiling on the total Guerrillas present.
- At a PKK Base, flip all Guerrillas there Underground.

In **Europe**, pay the Rally cost and raise Europe by one instead of placing pieces. If the Ban marker is present, Europe Rally costs 2 and Europe cannot exceed 3.

After Rally placement, the PKK may Agitate in one selected space with a PKK Base or PKK Control (3.6). Pay normal Agitation costs even if Rally is free. ERNK, Academy and Momentum may modify these options (5.2).

3.3.2 March

Cost: 1 Resource per destination; add 1 for a Restricted host destination.

Move Guerrillas one step from adjacent spaces or camp boxes into each selected destination. A moving piece can move only once. No March enters or leaves Western Cities. No March enters Europe or Iran. Leaving a camp is allowed even if its posture is closed to entry.

A moving group becomes Active if both conditions hold:

- Its destination is at Support, or it crosses into or out of an external box; and
- Its group size plus State pieces in the destination is **more than three**.

Entry into a Restricted box always activates the entering group. Hostile or Aligned boxes are closed to entry. Syria at Restricted follows the selected prototype option (8.1.3). A Limited March has one destination and may use several adjacent origins.

3.3.3 Attack

Cost: 1 Resource per selected space with Guerrillas and State pieces.

Activate all Guerrillas there and roll one die for each space. If the roll is at most the Guerrilla count there, remove up to two State pieces. Choose Troops or Police first, then Guards, then State Bases. For every Troop removed, remove one Guerrilla as attrition. On a roll of 1, also place one Available Underground

Guerrilla. Return all removed pieces to Available.

Ambush replaces this procedure in its selected spaces: no roll, activate one Underground Guerrilla, remove one State piece, no attrition and no bonus Guerrilla (4.3.1). Other Attack spaces resolve normally.

3.3.4 Coerce

Cost: 1 Resource per selected space; **2 if Pop is 3 or more**.

Select domestic spaces at Neutral or Support with an Underground Guerrilla and no Displacement. Activate one Guerrilla in each. If no Coercion marker is already there, a space at Support shifts one level toward Neutral, then receives one Coercion. A Neutral space receives the marker without shifting.

An existing Coercion marker prevents an additional marker and blocks the shift; activation still occurs. Coerce never shifts a space toward Opposition. Coercion counts against the PKK Harm gate until removed.

3.4 Movement Restrictions

Guards and Bases never move. Air Mobility never takes Troops into or out of an external box. Troops in Iraqi zones remain until Redeploy unless a specific Event removes them. Garrison and Sweep cannot connect Western Cities to the regional map. A river drawing does not create an extra movement link or cost.

3.5 Detection Before Destruction

Underground Guerrillas cannot be removed by ordinary Assault or Cross-Border Assault. Sweep or Garrison can activate them first. PKK actions also expose Guerrillas as specified. A specific Event can override ordinary removal restrictions when its text says so.

3.6 Civic Action and Agitation

3.6.1 Civic Action. The State needs Control and at least one Police. During Propaganda it also needs at least one Troop. Pay for any combination of these steps, clearing all relevant blocks before shifting:

Civic Action step	Cost
Remove one Coercion	1
Relief: remove one Reception	1
Redress: remove one State Harm	3
Return: remove one Displacement	3
Shift one level toward Support	2

Maximum two Support shifts per space per action or phase. Return is permitted at Normalizing, in C5 or by an applicable Event; it does not itself remove State Harm or grant Support. The State's **total** Propaganda Civic Action spending may not exceed half current Legitimacy, rounded down. There is no such cap on Train Civic Action.

3.6.2 Agitation. The PKK needs a **PKK Base or PKK Control**, both during Rally and during Propaganda. ERNK gives a Rally-only City exception (5.2). Pay any combination:

Agitation step	Cost
Remove one Coercion	1
Redress: remove one PKK Harm	2
Shift one level toward Opposition	1

Maximum two Opposition shifts per space per action or phase. Remove every Coercion and PKK Harm marker that blocks the planned shifts. Agitation has no Legitimacy-based spending cap. It is limited by PKK Resources. In an external Base space it can remove qualifying markers, but cannot shift a political level because the box has none.

EXAMPLE: *Botan has a PKK Base, one Coercion and one PKK Harm. One Opposition shift costs 4 Resources: 1 to remove Coercion, 2 to redress PKK Harm and 1 to shift. The PKK may instead pay only for removals and make no shift.*

4.0 Special Activities

4.1 General Rules

Take at most one Special Activity with an Op + SA choice. It may accompany only the Operations listed for it. No SA accompanies Op Only or Limited Op. Its spaces may differ from the Operation unless its rule requires an overlap. Pay its cost in addition to the Operation cost. Timing is before or after, subject to 2.7.

4.2 State Special Activities

4.2.1 Air Mobility

Accompanies: any State Op. **Cost:** free.

Move up to four Troops among up to three domestic spaces. Count **origins and destinations** toward the three-space limit. Western Cities is allowed. External boxes are never allowed, even as origins. Strike Force raises the limits to six Troops among four spaces (5.2).

4.2.2 Cross-Border

Accompanies: Sweep or Assault. **Timing:** before. **Cost:** 2 extra Resources, or zero extra if the target host is Aligned with Turkey.

Choose one zone, also selected for the Operation:

- **KDP:** normally requires KDP Restricted, Hostile or Aligned.
- **PUK:** requires both PUK and KDP Restricted, Hostile or Aligned.
- **Early hot pursuit:** in C1/C2, with the option allowed, KDP may be entered at any posture, but the total Troops there after the move may not exceed three. No such exception opens PUK.

Move up to six Troops from Hakkari and/or Botan into the target zone. PUK movement may pass through KDP as part of this lift. Conduct the accompanying Sweep or Assault in the zone as one selected location. It is Mountain terrain. If its host is Aligned, ignore the Mountain divisor for Assault.

If Cross-Border Assault removes any PKK piece and the zone has no Disputed Harm, place one Disputed Harm marker there. Troops remain in the zone until Redeploy and give no Control. Never Cross-Border into Syria-Bekaa or Iran.

4.2.3 Diplomacy

Accompanies: any State Op. **Cost:** 2 Resources.

Target one of Syria, KDP, PUK or Europe. Roll one die, adding or subtracting:

- +1 at Legitimacy 12 or more; −1 at Legitimacy 5 or less.
- −1 for Syria before C5. This applies throughout Scenario A.
- +1 for KDP from C3; this does not apply in Scenario A.
- Any bonus printed by the granting Event.

A modified result of 5 or more moves the host one step toward Hostile, or lowers Europe by one. Moving a host from Hostile to Aligned requires 6 or more. Syria has no Aligned step; a further move at Hostile has no posture effect. A posture change may activate Guerrillas and flip the Leadership Abroad (8.1).

EXAMPLE: *At Legitimacy 12, Diplomacy against Syria in C2 has +1 for Legitimacy and −1 for early Syria: net zero. A die roll of 5 moves Syria one step toward Hostile. A natural 6 does not bypass the modified-total requirement for another*

target.

4.3 PKK Special Activities

4.3.1 Ambush

Accompanies: Attack. **Timing:** before. **Cost:** free.

Choose up to two Attack spaces, each with an Underground Guerrilla. In each, **do not roll**. Activate exactly one Underground Guerrilla and remove one State piece in the Attack removal order: Troops or Police first, then Guards, then State Bases. No Guerrilla is lost to attrition and no roll-of-1 bonus is received. Other Guerrillas remain as they were.

Ambush Momentum increases the limit to three spaces. The no-roll procedure still applies in every Ambush space.

4.3.2 Extort

Accompanies: any PKK Op. **Cost:** free.

Choose any subset of qualifying locations. In each, activate one Underground Guerrilla and gain one Resource. A domestic space needs Pop of at least one, PKK Control and no Displacement. An external camp needs Host or Tolerant posture and an Underground Guerrilla. Europe and Iran do not qualify as host camps.

4.3.3 Strike Collaborators

Accompanies: Rally, March or Coerce. **Timing:** before. **Needs:** Law 3175. **Cost:** 1 Resource per selected space.

Select up to two spaces, each with an Underground Guerrilla and at least one Guard. Remove up to two Guards **in total**, activate one Guerrilla in each selected space and place one PKK Harm in each. Lower Europe by one, once for the action.

This SA gives no Support/Opposition shift. The resulting PKK Harm blocks subsequent Agitation shifts there until the PKK pays 2 per marker to redress it. A removed Guard returns to State Available and never becomes a PKK piece.

4.3.4 Host Pressure

Accompanies: Rally or March. **Cost:** 2 Resources.

Select one host box with a PKK piece. Syria also requires Leadership Present. Roll one die:

Host	Toward Host	Toward Hostile	No change
Syria or PUK	4–6	1	2–3
KDP	5–6	1–2	3–4

Move one posture step in the indicated direction. If before-Operation Host Pressure makes the planned Rally locations or March destinations illegal, keep the roll and paid SA cost. Choose new legal locations for **the same Operation**. Do not reroll or pay for Host Pressure again. In the simulator, this is a continuation of the saved action, not a second action.

5.0 Events

5.1 Executing Events

The executing faction chooses the unshaded or shaded side, not both. Either faction may choose either side unless the card expressly restricts it. The executing faction makes choices that the card does not assign to someone else.

Card text overrides an ordinary rule when it says to do so. It does not waive stacking, finite piece supply or track endpoints unless explicitly permitted. Do as much as possible. If a piece or marker is unavailable, skip that placement and record it. Marker exhaustion does not create a substitute marker; Harm exhaustion is a playtest warning.

An Event may grant a free Operation or SA. Its ordinary Resource cost is waived, but its location limits, required targets and other conditions still apply unless overridden. Civic Action, Agitation and Redress retain their normal extra costs. A free action does not move an initiative cylinder separately; the acting faction remains in the Event box for its card choice.

Always instructions apply on reveal even if nobody executes the Event, or a Pivotal covers it. An ordinary Event's optional text does not apply merely because the card is revealed.

5.2 Capabilities and Momentum

A Capability lasts for the game. Momentum lasts until the next Reset. Keep the selected side visible. The current Event takes precedence over a conflicting lasting effect. The C1/C2 lasting effects are:

- **ERNK (DK-004 shaded, Capability):** Rally Agitate may select a City with a PKK Guerrilla even without a PKK Base or PKK Control. It does not change Propaganda Agitation eligibility.
- **Tribal Allies (DK-006 unshaded, Capability):** Train may recruit Guards in a State-Controlled Mountain or Plain without Police. Law 3175 and all other limits still apply.
- **Extra Agitate (DK-007 shaded, Momentum):** Rally may Agitate in one extra selected space, at normal cost. Do not spend twice in the same space as separate Agitations.
- **Academy (DK-009 shaded, Capability):** while Syria is Host or Tolerant, Rally in Syria-Bekaa may place up to two extra Guerrillas in addition to its normal recruitment allowance.
- **Rivals (DK-010 unshaded, Momentum):** a Rally recruitment at a Mountain PKK Base places one fewer Guerrilla, minimum one.
- **Ambush (DK-011 shaded, Momentum):** Ambush may select up to three Attack spaces.
- **Strike Force (DK-022 unshaded, Capability):** Air Mobility may move up to six Troops among up to four domestic spaces.

A Capability card's other side may be a one-time Event. Taking that other side does not install the lasting effect printed on its opposite side.

5.3 Pivotal: ARGK Formed

In Scenario A, only the PKK holds a Pivotal: **DK-015 ARGK Formed**. It requires at least eight Guerrillas and at least two PKK Bases in domestic spaces. External pieces do not meet these conditions.

After an Event card is revealed and its Always line is applied, but before First Eligible chooses, the PKK may play ARGK if eligible. Pivotal priority belongs to Second Eligible if both factions could play one; Scenario A has no State Pivotal. Declining preserves the card for a later eligible window.

Place ARGK over the revealed Event. The underlying Event cannot be executed. Place up to four Available Guerrillas among spaces with PKK Bases. Then flip all Guerrillas Underground in **every space with a PKK Base**, including spaces receiving no placement. Gain three PKK Resources.

The PKK becomes First Eligible and occupies the Event box. The State may take Op + SA or Pass. The PKK stays First Eligible next card. ARGK is used once and leaves the hand permanently.

5.4 Mandatory Structural Cards

These cards must be in their Campaign pile and in its top eight Event positions. Their Always lines apply on reveal:

Campaign / card	Always instruction
C1: DK-003 Law 3175	Move all 16 Guards from Out of Play to Available. Set the Law in effect.
C1: DK-005 KDP Orders PKK Out	If KDP is Host, set it to Tolerant.
C2: DK-019 Syria Security Protocol	If Syria is Host, set it to Tolerant.
C2: DK-020 OHAL	If Emergency Rule is Martial Law, set it to OHAL.

5.5 Guard Abuse and Attribution

When Guard Abuse is executed, in **every qualifying space** with a Guard and any Harm marker, lose one Legitimacy and remove one Guard. Apply once per qualifying space. Coercion alone is not a Harm marker for this instruction, although it counts toward PKK Harm for victory.

Use the Harm attribution printed on the card. Disputed Harm remains Disputed unless a specific rule changes it. Do not assign it to a faction by inference from a card title or historical assumption.

6.0 Propaganda Rounds

Conduct these steps in order when Propaganda is revealed. Skip an immediately consecutive Propaganda card without conducting another round. The **first** Propaganda round skips the victory check. The **final** round gives no income and ends after Agitation unless a faction already wins at the opening check.

6.1 Victory Phase

Skip in round one. In round two, check both scores and Harm gates as in 7.2. If a winner qualifies, end the game immediately. Do not then pay income, upkeep or conduct political spending.

6.2 Resources Phase

Skip income in the final round. In a non-final round:

State income: 8 + half Legitimacy, rounded down + the Pop of each State-Controlled Mountain or Plain that contains a State Base. Count the space's Pop once, regardless of its Base count. Cities do not add this income term.

PKK income: one per domestic PKK Base + one per PKK Base in a Host or Tolerant camp + Leadership income + Europe income. Leadership Present gives 2 if Syria is Host, 1 if Tolerant and 0 otherwise. Abroad gives none. Europe gives 0/1/2 as in 1.7. Each faction stops at 50 Resources.

> ***EXAMPLE:*** *On the starting board the State's income is 19 and PKK income is 5. Starting Resources of 12 and 5 would become 31 and 10 in a non-final round before upkeep. No such addition occurs in Scenario A's final round.*

6.3 Guard Upkeep

The State pays one Resource per two Guards on the map, **rounded up**. If it cannot pay, remove Guards of its choice until it can pay for those remaining, then pay that reduced upkeep. If it can pay the full amount, it must pay; it cannot dismiss Guards voluntarily in this step.

6.4 Legitimacy and Emergency Rule

Apply the following in order, with the normal Legitimacy bounds and overflow rule:

1. **Emergency drain:** Martial Law −1; OHAL −1; OHAL Extended Powers −2; Normalizing 0.
2. **Displacement:** lose one Legitimacy per New Displacement and flip each New marker to Old.
3. **Reception:** lose one Legitimacy if three or more Reception markers are on the map.
4. **Disputed Harm:** lose one Legitimacy if three or more Disputed Harm markers are on the map.
5. **Covert exposure:** if at least three face-down Covert markers are on the map, randomly reveal one. It becomes State Harm and costs two Legitimacy. Covert Action itself is outside Scenario A's implemented action set.
6. **Europe:** raise Europe by one if State Harm is at least three greater than PKK Harm; lower it by one if PKK Harm is at least three greater than State Harm. Then lose one Legitimacy if Europe is 4 or 5.
7. **Gains:** gain one Legitimacy if no New Displacement was flipped. Later-design gains for Open Legal Space with two Offices or for maintained Reciprocal Restraint/Talks do not normally arise in Scenario A.
8. **Emergency choice:** the State may make one permitted move (8.2), or keep the current step. Apply any return-to-OHAL cost.

6.5 Legal Politics

Skip while Legal Space is Absent in C1/C2. Legal Politics, party closure and negotiations belong to later Campaigns and are not enabled as playable systems in this prototype edition.

6.6 State Civic Action

The State may spend in any number of eligible spaces. Each requires State Control, Troops and Police. Use 3.6.1. Total spending across all spaces cannot exceed half current Legitimacy, rounded down, and cannot exceed State Resources. The State may spend nothing.

6.7 PKK Agitation and Final-Round End

The PKK may spend in any number of spaces with a PKK Base or PKK Control, using 3.6.2. A Guerrilla alone without either condition is insufficient. The PKK may spend nothing.

Final round: after Agitation, reveal all face-down Covert markers, replacing each with State Harm and losing two Legitimacy each. Recompute final margins and determine the winner (7.3). Skip Redeploy and Reset.

6.8 Redeploy

In a non-final round, use Control and the piece inventory from **before** Redeploy. State moves first, then PKK. A piece moves at most once; arrivals cannot be used as new departures.

- State may move Troops to any domestic City or domestic space with a State Base. **All Troops in KDP and PUK must leave** this way.
- State may move Police to any space it Controlled before Redeploy. Guards never move. Bases never move.
- PKK may move Guerrillas to an adjacent space or box with a PKK Base. Host entry limits apply. A Restricted camp costs one Resource per destination and activates arrivals. No entry into a Hostile or Aligned camp.

Optional movements may be omitted. Required Iraqi Troop departures may not be skipped. Recompute Control after both factions finish.

6.9 Reset

1. Remove one Coercion from each space that has any.
2. Flip **all Guerrillas Underground**, including those in Hostile or Aligned boxes. This is an explicit Reset exception to their posture activation.
3. Discard all Momentum. Capabilities remain.
4. Remove Restraint Broken markers, if present.

5. Advance the Campaign. In Scenario A, the first Reset enters C2; its structural cards still apply only when revealed.
6. Set PKK First Eligible, clear initiative boxes and reveal the next card.

7.0 Victory

7.1 Scores and Thresholds

State score = Total Support + Legitimacy.

PKK score = Total Opposition + domestic PKK Bases.

Passive levels contribute Pop; Active levels contribute twice Pop. Neutral contributes none. Count only domestic Support/Opposition and domestic PKK Bases. Control, external Bases and removed enemy pieces add no points.

Scenario A thresholds are **49 State** and **30 PKK**. Each faction's Harm limit is **6**. These are playtest values, not historical measures.

7.2 Victory Check

Check at the start of each Propaganda round except the first. A faction qualifies if its score reaches or exceeds its threshold **and** its Harm count is at most six. If only one qualifies, it wins immediately. If both qualify, compare score minus threshold. The higher margin wins. Equal margins go to lower Harm, then to PKK.

For this check only, count each face-down Covert marker as two fewer State score and one additional State Harm, without physically revealing it. This prevents an immediate victory from ignoring the hidden cost. There is no ordinary Covert Action in Scenario A.

If neither qualifies, continue the round. Being above the Harm limit prevents victory at this check, not all possible victory at final scoring.

7.3 Final Scoring

After final Agitation and any required Covert reveals, calculate each faction's:

Final margin = score − threshold − 2 × excess Harm.

Excess Harm is the Harm count above six, or zero if the count is six or less. The higher final margin wins, even if both are negative. Equal margins go to the faction with less Harm; if still tied, PKK wins.

> ***EXAMPLE:*** *State score 43 with Harm 4 gives 43 − 49 = −6. PKK score 26 with Harm 7 gives 26 − 30 − 2 = −6. State wins the tied margin because its Harm is lower. Without the extra PKK Harm penalty, PKK's margin would be −4.*

Record a margin difference of five or less as a narrow result and six or more as a clear result. These labels describe the result; they do not change the winner.

7.4 Outcome Record

Record the winner, ending round, both scores, thresholds, final margins and Harm counts. Also record Legitimacy, Europe, host postures, Support/Opposition totals and any Harm or displacement remaining. Civilian effects are part of the record, not a second score or a reward.

For playtests, note repeated initiative streaks, forced Pass sequences, ambiguous rules and any harm-causing action that improves its user's relative margin. These are review flags, not extra automatic game endings.

8.0 Political and Sanctuary Systems

8.1 Host Postures

Syria, KDP and PUK each have a separate posture track. From most open to most closed:

Host → Tolerant → Restricted → Hostile → Aligned with Turkey.

Syria stops at Hostile. Postures never reset automatically and one host's change does not move another. No posture change deletes pieces.

8.1.1 Host. Rally may recruit Guerrillas or build Bases. March entry is normal. Each Base earns one PKK income at non-final Propaganda. Normal State Cross-Border access is closed, subject to the early KDP exception.

8.1.2 Tolerant. Rally may recruit Guerrillas but may not build a Base in this C1/C2 edition. March entry and Base income remain normal. A Northern Iraq Vacuum exception belongs to C3 and is outside Scenario A.

8.1.3 Restricted. No Rally and no Base income. March entry costs one extra Resource and activates the group. The prototype default allows this entry into Syria-Bekaa too; the alternative option closes Syria at Restricted. Select the option before play and keep it for the session.

8.1.4 Hostile or Aligned. No Rally, March entry or Base income. A posture shift reaching either state activates Guerrillas in that box. Reset later flips them Underground (6.9); the exception does not reopen the box. Normal Cross-Border access to KDP/PUK is permitted. Aligned removes the extra Cross-Border cost and the Assault Mountain divisor.

8.1.5 Leadership. The marker starts Present in Syria-Bekaa. Present gives income only while Syria is Host or Tolerant. When Syria reaches Hostile, flip it Abroad. Abroad gives no income and prevents Host Pressure against Syria. Returning Syria to a more open posture does not by itself flip Leadership back. Capture is a later C5 Event, not an automatic result in Scenario A.

8.2 Emergency Rule

The track is Martial Law, OHAL, OHAL Extended Powers and Normalizing. Its Propaganda drains are 1, 1, 2 and 0 respectively. OHAL Extended Powers reduces Sweep cost to one per space.

Martial Law becomes OHAL only through the OHAL card. It never returns to Martial Law. At Propaganda, OHAL may move to Normalizing; Normalizing may return to OHAL at a cost of one Legitimacy; OHAL Extended Powers may move to OHAL. A voluntary move from OHAL to Extended Powers is unavailable before C3. An Event may specify its own change.

Village Clearance and Covert Action are not implemented Scenario A actions. Do not add them merely because a wider research table lists an unlock at an Emergency Rule step.

8.3 Village Guards

All 16 start Out of Play. Law 3175 moves them to Available. Recruit them through Train or applicable Events after the Law. They are local, immobile State pieces: they count for Control and detection in their space, but not Assault. Pay upkeep at every Propaganda, including the final round unless the opening victory check already ended the game.

Guards removed by Attack, Strike Collaborators, upkeep or Events return to State Available. No Guard converts into a PKK piece. Guard Abuse is once per qualifying space (5.5).

8.4 Civilian Markers

State Harm: counts toward State Harm and blocks shifts toward Support. Redress costs three each.

PKK Harm: counts toward PKK Harm and blocks shifts toward Opposition. Redress costs two each.

Disputed Harm: counts for neither faction; three or more cost one Legitimacy at Propaganda. Ordinary Redress cannot remove it; use an applicable Event.

Coercion: blocks shifts both ways and counts toward PKK Harm. Remove for one Resource by Civic Action or Agitation. Reset removes one per space.

Reception: a receiving-city obligation. Remove for one Resource by Civic Action before shifting that space toward Support. Three or more cost one Legitimacy at Propaganda.

Displacement: blocks Rally, Extort and Coerce. It never changes Pop. New costs one Legitimacy at Propaganda, then becomes Old. Return removes it under 3.6.1. Ordinary Village Clearance placement is outside this playable edition.

Office: if introduced by a relevant later rule, caps the space at Passive Support and Passive Opposition; it contributes no Control or victory points. The Legal Politics system that normally places it is not active in Scenario A.

9.0 Key Terms

Activate: change an Underground Guerrilla to Active. It remains the same piece.

Adjacent: connected by an authoritative gameplay border or link, not merely near on the illustration.

Always: mandatory card instruction applied when revealed, before player choice.

Available: the supply from which pieces may be placed. Out of Play is separate.

Base: immobile infrastructure. Domestic PKK Bases score; external Bases do not.

Campaign: the current period, advanced by Reset. Some cards from the previous pile may remain after a Propaganda card.

Capability: a lasting Event effect that stays for the game.

Control: a strict piece majority in a domestic space, independent of its political level.

First / Second Eligible: the order of the two factions' choices on a card. Both normally receive a choice.

Free: ordinary Operation or SA Resource cost waived, not a waiver of every condition or political spending cost.

Harm gate: the maximum Harm count of six allowed for victory at an opening Propaganda check.

Location: a selected map space, permitted box or Europe for Rally. For movement Operations, limits usually concern destinations.

Margin: score minus threshold; at final scoring, also subtract excess Harm penalties.

Momentum: a lasting effect discarded at Reset.

Op / SA: Operation / Special Activity. One SA only with a permitted Op + SA choice.

Pop: a fixed design weight used for political scores and some costs or placements.

Posture: one host's relationship and access state. No Control applies in its box.

Redress: pay to remove the relevant faction's Harm marker; it does not itself shift a level.

Underground: a Guerrilla state protected from ordinary Assault, not an absence from Control counts.

10.0 Scenario A: 1984–1989

10.1 Scope and Options

Start: 15 August 1984. Use piles C1 and C2. Round two is final. State threshold 49; PKK threshold 30. Harm limit six each. State holds no Pivotal; PKK holds ARGK Formed.

Before play, record whether **early KDP hot pursuit** is allowed and whether **Restricted Syria March** is allowed. The prototype defaults allow both. The hot-pursuit exception is a low-evidence design assumption; the options make its effect testable.

10.2 Starting Position

Set State Resources 12, PKK Resources 5, Legitimacy 10, Europe 1 and Campaign C1. Emergency Rule is Martial Law. Syria is Host, KDP Host and PUK Tolerant. Legal Space is Absent and Ceasefire None. There are no Harm, Coercion, Reception, Displacement, Covert or Office markers.

All Guerrillas below start Underground. Unlisted spaces or piece types are empty. State abbreviations: T = Troops, P = Police, B = State Base. PKK: G = Guerrillas, B = PKK Base.

Space	State	PKK
Hakkari	2T, 1P	2G
Botan	2T, 1P	2G, 1B
Mardin-Batman	1T, 1P	1G
Diyarbakır City	3T, 2P, 1B	—
Diyarbakır Rural	1P	—
Şanlıurfa	2P	—
Adıyaman	1P	—
Elazığ	1T, 1P, 1B	—
Dersim	1T, 1P	—
Bingöl-Muş	1T, 1P	—
Van-Bitlis	2T, 1P, 1B	—
Ağrı	1T, 1P	—
Western Cities	2T, 2P, 1B	—
KDP Zone	—	3G, 1B
PUK Zone	—	—
Syria-Bekaa	—	2G, 1B, Leadership Present

Set **Passive Opposition** in Hakkari and Botan. Set **Passive Support** in Şanlıurfa, Adıyaman, Elazığ and Western Cities. All other domestic spaces are Neutral.

Available: 14 Troops, 8 Police, 4 State Bases, 20 Guerrillas and 9 PKK Bases. All 16 Guards are Out of Play. Starting scores: State 21; PKK 4. Starting margins: −28 and −26. Harm counts: zero each. Botan has no Control; all other occupied domestic spaces are State-Controlled.

10.3 Build the Deck

For each Campaign separately:

1. Take its mandatory structural cards (5.4). Randomly draw from that Campaign's other eligible Event, Capability and Momentum cards until there are 12 cards in the pile. Do not include ARGK or the Propaganda card in these 12.
2. Shuffle the 12. Separate the top eight from the bottom four.
3. If a mandatory card is in the bottom four, exchange it with the lowest non-mandatory card in the top eight. A required earlier chain card also receives this protection.
4. Apply chain order: if both cards of a listed pair are present, put the earlier card above the later card by swapping them if necessary. The Scenario A pair is **DK-028 Paris Kurdish Conference before DK-029 SHP Expels Kurdish Deputies**, when both are dealt. There is no additional C1 chain in the current package.
5. Shuffle the Campaign's Propaganda card into the bottom four,

making five cards, and put the top eight above them. Propaganda is now in position 9–13.

Stack C1 above C2. Set unused pool cards aside unseen. Keep ARGK in the PKK hand. Set PKK First Eligible and reveal the first card.

S0 test exception: S0 uses a smaller eight-card C1 selection, excludes the later slice's Capabilities, Momentum and Pivotals and puts Propaganda last. It ends after one round and is marked not comparable. It is not Scenario A.

10.4 Movement Links

Use each link in both directions, subject to action and posture restrictions. The complete domestic link list is:

- Hakkari–Botan; Hakkari–Van-Bitlis.
- Botan–Van-Bitlis; Botan–Mardin-Batman.
- Mardin-Batman–Van-Bitlis; Mardin-Batman–Bingöl-Muş; Mardin-Batman–Diyarbakır Rural; Mardin-Batman–Şanlıurfa.
- Diyarbakır City–Diyarbakır Rural.
- Diyarbakır Rural–Şanlıurfa; Diyarbakır Rural–Adıyaman; Diyarbakır Rural–Elazığ; Diyarbakır Rural–Bingöl-Muş.
- Şanlıurfa–Adıyaman.
- Elazığ–Bingöl-Muş; Elazığ–Dersim; Dersim–Bingöl-Muş.
- Bingöl-Muş–Van-Bitlis; Bingöl-Muş–Ağrı; Van-Bitlis–Ağrı.

External movement links are Hakkari–KDP, Botan–KDP, KDP–PUK, Mardin-Batman–Syria-Bekaa and Şanlıurfa–Syria-Bekaa. There is no gameplay movement link to Iran, Europe or Western Cities. Iran's geographical border does not grant March access.

10.5 End and Debrief

At the second Propaganda, check victory first. If nobody wins, skip income, resolve the other steps through Agitation and compare final margins. Do not Redeploy or Reset after final scoring.

In the simulator, save a debrief note and export it with the session. For a physical test, write the same details on paper: scenario, options, winner, final margins, Harm counts, unclear rules and any rule changes tested. Designer completion of this playthrough and notes export remains the IC-3a checkpoint.

A.0 C1/C2 Card Reference

Current package text is reproduced below for reading beside the rules. Original card cross-references use research chapter numbers (Appendix B). U means unshaded and S shaded; either faction may choose either side unless restricted. Always instructions apply on reveal. A card need not be drawn in every game.

A.1 Campaign C1: 1984–1986

DK-001 · Eruh and Şemdinli (15 Aug 1984)

U: Martial law reinforcement: place 2 Troops from Available in Hakkari or Botan. State Resources +2.

S: Opening raids: place 2 Underground Guerrillas in Hakkari and 1 in Botan. Shift Botan one level toward Opposition.

DK-002 · Raid in Siirt (17 Aug 1984)

U: Police alert: the State conducts a free Garrison. Its Activation must be in Botan.

S: Second strike: place 1 Underground Guerrilla in Botan, then the PKK conducts a free Attack in Botan with Ambush (no roll).

DK-003 · Law 3175 (Mar 1985)

Mandatory structural card.

Always: Move all Guards from Out of Play to Available; Law 3175 is in effect.

U: Guard recruitment: place up to 2 Village Guards in each of up to 2 Mountain or Plain spaces with State Control and Police.

S: Recruitment under pressure and pay: State Resources -3. Shift one space with a Village Guard and no PKK Harm marker, or one Mountain space with State Control, one level toward Opposition.

DK-004 · ERNK Founded (Mar 1985)

U: Front network exposed: remove 1 Guerrilla from Diyarbakır City or Western Cities, or PKK Resources -2 (State choice).

S: PKK Capability (ERNK): Agitate in a Rally may select a City with a PKK Guerrilla even without a PKK Base or PKK Control.

DK-005 · KDP Orders PKK Out (Oct 1985)

Mandatory structural card.

Always: If KDP is Host, set its posture to Tolerant.

U: KDP posture one more step toward Hostile.

S: Guests stay: the PKK moves up to 3 Guerrillas from the KDP Zone to the PUK Zone or Hakkari, Underground, free, or places 2 Underground Guerrillas in the PUK Zone. PKK Resources +1.

DK-006 · Chiefs Enter the Guard System (1985)

U: State Capability (Tribal Allies): Train may place Village Guards in a Mountain or Plain space with State Control even without Police. Needs Law 3175.

S: Armed retinues: apply Guard Abuse (07, section 4.7). Then shift one space with a Village Guard one level toward Opposition.

DK-007 · ERNK Action Campaign (Jun-Nov 1985)

U: Police raids: the State conducts a free Garrison. Place 1 Police in Diyarbakır City.

S: PKK Momentum: until the next Reset, each Rally may Agitate in one extra space (normal cost).

DK-008 · Former Member Killed Abroad (Nov 1985)

U: Europe -1. PKK Resources -1.

S: Damage control: Europe -1. PKK Resources +1.

DK-009 · Bekaa Training Academy (1986)

U: Camp watched: the State conducts a free Diplomacy targeting Syria with +1.

S: PKK Capability (Academy): while Syria is Host or Tolerant, a Rally in Syria-Bekaa places up to 2 extra Guerrillas there.

DK-010 · Rival Groups Form the TSK (1986)

U: Recruits divided: PKK Resources -2. State Momentum: until the next Reset, a PKK Rally in a Mountain space places 1 fewer Guerrilla (minimum 1).

S: Rivals do not field a force: PKK Resources +2. Place 1 Underground Guerrilla in Van-Bitlis or Ağrı.

DK-011 · PKK Spring Offensive (Mar 1986)

U: Patrol security: the State conducts a free Sweep in up to 2 Mountain spaces.

S: PKK Momentum: until the next Reset, Ambush may select up to 3 Attack spaces.

DK-012 · Ankara Names a Guerrilla War (May 1985)

U: War budget: State Resources +4. Place 2 Troops from Available in any Mountain spaces.

S: Recognition of the conflict: Europe +1. PKK Resources +1.

DK-013 · Border Attack and Air Raid into Northern Iraq (Aug 1986)

U: Hot pursuit raid: the State conducts a free Assault with Cross-Border in the KDP Zone (06, section 3.2, hot pursuit: at most 3

Troops). No extra Resources.

S: Camps rebuilt after the raid: the PKK places up to 2 Underground Guerrillas in the KDP Zone if its posture is Host or Tolerant. PKK Resources +1.

DK-014 · Human Rights Association Founded (Jul 1986)

U: Tolerated civil society: Legitimacy +1.

S: Documentation begins: Europe +1.

DK-016 · Propaganda

Propaganda: conduct 6.0. No player Event choice.

DK-100 · Neighbors Condemn the Raid (Sep 1986)

U: Ankara names the raid a reprisal for the loss of its soldiers: Legitimacy +1. State Resources +1.

S: Iran and Libya condemn the raid: shift Syria posture one step toward Host, or Europe +1 if Syria is already Host. PKK Resources +1.

A.2 Campaign C2: 1987–1989

DK-017 · Air Raids on Camps in Iraq (Mar 1987)

U: Remove 1 Guerrilla from the KDP Zone, or 1 PKK Base there if no Guerrilla remains. Place a Disputed Harm marker in the KDP Zone if it has none.

S: Camps disperse: move up to 3 Guerrillas from the KDP Zone to the PUK Zone or Hakkari, Underground.

DK-018 · Killings at Pınarcık (Jun 1987)

U: Place a Disputed Harm marker in Mardin-Batman. Place up to 2 Village Guards there (needs Law 3175). Europe -1.

S: Place a Disputed Harm marker in Mardin-Batman. The PKK may pay 2 Resources to remove 1 PKK Harm marker anywhere.

DK-019 · Syria Security Protocol (Jul 1987)

Mandatory structural card.

Always: If Syria is Host, set its posture to Tolerant.

U: The State conducts a free Diplomacy targeting Syria with +1.

S: Paper limits: Syria posture one step toward Host. The PKK conducts a free Rally in Syria-Bekaa.

DK-020 · OHAL (Jul 1987)

Mandatory structural card.

Always: If Emergency Rule is Martial Law, set it to OHAL.

U: Regional governor: the State conducts a free Garrison, then a free Sweep in one space.

S: Emergency rule draws scrutiny: Legitimacy -1. Europe +1.

DK-021 · Attacks on Rival Newroz Gatherings (Mar 1987)

U: Place a Disputed Harm marker in Botan or Mardin-Batman (State choice). Europe -1.

S: Block only: place a Disputed Harm marker in Botan or Mardin-Batman (PKK choice). No other effect.

DK-022 · Special Strike Force Planned (Jul 1987)

U: State Capability (Strike Force): Air Mobility may move up to 6 Troops among up to 4 spaces.

S: Plan stalls: State Resources -3. PKK Resources +1.

DK-023 · Final Anfal in Badinan (Aug 1988)

U: Border sealed: place 2 Troops in Hakkari and 1 in Botan.

S: World attention to Kurds: Europe +1.

DK-024 · Iraqi Kurdish Refugees Admitted (Aug-Sep 1988)

U: Humanitarian opening: Legitimacy +2. State Resources -2.

S: Camps under strain: place 1 Reception marker in Diyarbakır City. Europe +1.

DK-025 · Attacks on Village Schools (Nov 1988)

U: Place a PKK Harm marker in Mardin-Batman, Elazığ or Dersim (State choice). Europe -1.

S: Block only: place a PKK Harm marker in one of those spaces (PKK choice). No other effect.

DK-026 · Local Elections (Mar 1989)

U: Institutions renewed: Legitimacy +2.

S: Opposition mayors in the southeast: shift Diyarbakır City or Mardin-Batman one level toward Opposition.

DK-027 · Regional Force Doubled (1989)

U: Place up to 4 Troops from Available in Botan and Hakkari. The State conducts a free Sweep in Botan.

S: Rising tempo: the PKK conducts a free Attack in one space with an Underground Guerrilla and Troops. State Resources -2.

DK-028 · Paris Kurdish Conference (Oct 1989)

U: Diplomatic protest: the State conducts a free Diplomacy targeting the Europe track.

S: Europe +1. The PKK conducts a free Rally on the Europe track.

DK-029 · SHP Expels Kurdish Deputies (Nov 1989)

U: Party discipline holds: shift Şanlıurfa or Adıyaman one level toward Support if it has State Control and Police.

S: Expelled deputies speak abroad: Europe +1. Shift Diyarbakır City one level toward Opposition.

DK-030 · İkikaya Village Killings (Nov 1989)

U: Place a PKK Harm marker in Hakkari. Europe -1. Place 1 Village Guard in Hakkari (needs Law 3175).

S: Block only: place a PKK Harm marker in Hakkari. No other effect.

DK-031 · Çukurca Villagers Refuse Guard Duty (1989)

U: Prosecutions hold the line: place 1 Police and 1 Village Guard in Hakkari.

S: Guards hand back weapons: remove up to 2 Village Guards from Hakkari or Botan to Available. No Harm marker. State Resources -1.

DK-032 · Lawyer Access Decree (Sep 1989)

U: Custody reform: Legitimacy +2.

S: Lawyers barred again: Legitimacy -1. Europe +1.

DK-033 · Abuse and Killings in Custody Reported (1989)

U: Block only: place a State Harm marker in Mardin-Batman or Hakkari (State choice). No other effect.

S: Place a State Harm marker in Mardin-Batman or Hakkari (PKK choice). Legitimacy -1. Shift that space one level toward Opposition.

DK-034 · Governors Exile Local Party Members (Sep 1989)

U: Emergency powers: the State conducts a free Garrison with Activation in Botan or Dersim.

S: Banishment without trial: Legitimacy -1. Shift Botan one level toward Opposition.

DK-035 · Propaganda

Propaganda: conduct 6.0. No player Event choice.

A.3 PKK Pivotal in Hand

DK-015 · ARGK Formed

At least eight domestic Guerrillas and two domestic PKK Bases. Place up to four Available Guerrillas at PKK Bases, flip all Guerrillas in every space with a PKK Base Underground and gain three PKK Resources. DEC-55 clarifies the original card's phrase 'in those spaces'. See 5.3 for timing and initiative.

B.0 Prototype Notes and Sources

B.1 Edition Boundary

This is the playable **Scenario A, C1/C2** ruleset R3, dated 31 October 2026. It is a consolidated reading edition, not a new rules revision. The simulator source reviewed for this edition is main commit **4b5dbe8**. No rule, parameter or Event encoding was changed to make this document.

Scenarios B and C, the five-Campaign game, Legal Politics procedure, party closure, Village Clearance, Covert Action, ceasefire negotiations, later Pivotals and optional third-player modules are **not implemented as complete playable systems in this edition**. References to their tracks or markers explain existing components and generic adjustments; they do not authorize those actions in Scenario A. IC-3a still requires the designer to finish Scenario A and export notes.

B.2 Rule Precedence and Consolidation

The latest explicit designer decisions take precedence over older research wording. This edition incorporates:

- **DD-20:** no income in the final Propaganda; Propaganda Agitation uses a PKK Base or PKK Control; Ambush has no roll, one activation and one State removal, with no attrition or bonus; five revised C1 Event sides and the Strike Collaborators warning.
- **DEC-53:** Reset flips all Guerrillas Underground, including Hostile/Aligned camps.
- **DEC-54 and DEC-56:** Host Pressure interruptions retain the roll and paid cost while replanning the same Rally or March.
- **DEC-55:** ARGK flips Guerrillas in every PKK Base space, not only spaces receiving recruits.
- **DEC-57:** Guard Abuse applies once in every qualifying space.
- **PA-01 to PA-10 and PA-13/14/16/17:** executing-faction choices, bounded tracks, modified die totals, Coerce order, no-roll Ambush, detection after movement, finite supply, victory ties, seeded randomness, Air Mobility's domestic-only limits and Scenario A options/Pivotal scope.

The passing and eligibility procedure is the recorded DD-04 model. Passing does not automatically promote Second Eligible to First Eligible. The fixed default simulator seed of 1 is a reproducibility choice; select Random for a new game seed.

B.3 Differences That Need Design Review

These differences are made explicit rather than silently resolved. For **current simulator play**, this reading edition describes the implemented behavior. For a physical test using the research alternative, record the variant.

Op Only locations. Research 05 §2.2 describes First Eligible Op Only as two or more locations. The current engine accepts one or more. Its initiative effect is still the full Op Only effect, even at one location. A future decision must reconcile the restriction if the research wording is intended to bind.

Reclaiming on-map pieces. Research 04 §2.1 permits some owner-chosen removals to replenish an exhausted Available supply, excluding Guards and external pieces. Current Operation handlers require Available supply and do not offer this withdrawal mechanism. This edition does not invent a simulator withdrawal action.

No general COIN-series rule should be imported to fill either difference without recording the change. These are implementation/research differences, not additional printed-game advantages.

B.4 Primary Rule Sources

The source files below are in the *HandfullOfBandits* repository. Numbers in original card text refer to these research chapters, not necessarily to the section numbers of this consolidated book.

- **03 Map and Spaces:** space names, terrain, Pop, stacking and adjacency. The actual movement graph is `game-packages/kurdish-coin/0.1.0/map.yaml`; Iran has no gameplay movement links.
- **04 Pieces, Tracks and Markers:** inventory, Resources, Legitimacy, marker meanings and political levels.
- **05 Sequence of Play:** deck building, initiative, Pivotal windows, Propaganda and Reset.
- **06 Operations and Special Activities:** action procedures, costs and pairing.
- **07 Political, Civilian and Sanctuary Systems:** Civic Action, Agitation, Harm, Guards, Emergency Rule and hosts.
- **08 Event Deck:** pools, lasting effects, chain constraints and attribution.
- **09 Victory and Scoring:** thresholds, Harm gate, final margins and ties.
- **10 Scenarios and Setup:** Scenario A position and starting checks.

All eight chapters are under `research/research-final/package-b-coin-design/`. The decision register is `research/research-final/project-management/design-decisions.md`; prototype decisions are in `docs/prototype/13-design-decisions.md`. Package parameters, assumptions, scenario files and current card YAML supplied the implemented values.

B.5 Format Reference

The PDF and Markdown rule library in **Penguin-Pants/COIN_Research**, `research/rules`, was inspected at commit **b0e7c64**. The main format model is *Colonial Twilight*, revised May 2018. Comparative checks included *Cuba Libre*, *A Distant Plain*, *The British Way: Malaya* and *People Power*. The library's 22 rule PDFs and corresponding Markdown files were inventoried for structure and page format.

This edition follows their numbered-rule hierarchy, compact two-column body, serif reading text, bold headings, running folios, italic examples, tables and illustrated title/contents page. The layout is adapted to **A4 portrait, 210 × 297 mm**. The principal originals use US Letter or similar sizes, so line endings and page counts cannot be identical. Openly available Liberation font equivalents replace the originals' embedded Times/Myriad fonts. Publisher logos, third-party cover art and official publication claims are not reproduced.

Printing: use A4 portrait at **100% / Actual size**. The PDF has searchable text, embedded fonts, running page numbers and a linked contents list. It can be printed in grayscale; color is not needed to interpret a rule. For duplex printing, use long-edge binding. No bleed or crop marks are required.
